

Take control of shared vehicles and equipment and eliminate booking chaos

BOOK → USE → RETURN

The Asset Booking module from **Blackhawk.io** makes it simple to reserve, track, and return shared assets. Eliminate confusion, reduce downtime, and make sure your gear is always where it needs to be – when it needs to be there.

TOP 3 OUTCOMES / BENEFITS

- ✓ **Better Efficiency** – Vehicles ready when needed.
- ✓ **Higher Utilisation** – Maximise use of shared resources.
- ✓ **Clear Accountability** – Always know who has what (cost centers).

TOP 3 PAIN POINTS SOLVED

- ✗ **Manual Processes** – No more whiteboards or updating spreadsheets.
- ✗ **Booking Inefficiency** – Avoid scheduling conflicts entirely.
- ✗ **Lost Time** – End the hunt for missing equipment or keys.

TOP 3 KEY CAPABILITIES

- 📅 **Live Calendar View** – Book and see availability in real time.
- 📱 **Mobile Check-In/Out** – Self-manage bookings live (associate costs).
- 👤 **Site & Role Assignment** – Group assets and Control bookings by operator or location.

Real results

EXAMPLE CUSTOMER STORY

- ✓ 120,000 bookings in 12 months.
- ✓ 600 shared vehicle fleet.
- ✓ 2,000+ staff.
- ✓ Hundreds of thousands of dollars saved.
- ✓ Redistribution of vehicles to locations where they are most needed.
- ✓ Right-sizing of fleet requirements.
- ✓ Optimisation of proactive maintenance and compliance.

How it Works

PROBLEM:

SOLUTION:

"I can't find the trailer."

Live bookings show exactly who has it, when it's due back, and where it is right now.

"We're double-booking resources."

Shared calendar view prevents conflicts before they happen – no more awkward conversations or wasted trips.

"We waste time chasing keys."

Digital check-in/out with optional smart key box means no more lost keys or manual sign-out sheets.

"We don't know which site has the asset."

Location-aware bookings match assets to specific sites, teams, or job numbers, with automatic tracking on return.

"We forget to return things on time."

Automated reminders prompt users ahead of return deadlines – freeing up assets for the next job without delays.

"We want to enable shared assets for our clients, but don't know how."

Pay-per-Use and Access Control extensions enable Asset Booking to expand into innovative business models and new ways of providing equipment to your customers or subcontractors.

Simple, automated workflow

Any vehicles, shared assets and other resources can apply pool booking to automate bookings and administration:

ABOUT BLACKHAWK.IO – intelligent operations

Blackhawk.io connects people, equipment, and data to make operations smarter. We integrate and automate through IoT, AI, and digital workflows that are easy for people to use – turning digital transformation into everyday reality. Our platforms improve maintenance, compliance, and collaboration across the entire equipment lifecycle. By combining human expertise with intelligent technology, we help teams work faster, make better decisions, and achieve more together.
