- ✓ 2,000+ staff.
- ✓ Hundreds of thousands of dollars saved.
- ✓ Right-sizing of fleet requirements.
- ✓ Redistribution of vehicles to locations where they are most needed.
- ✓ Optimisation of proactive maintenance and compliance.

## How it Works

### PROBLEM:

### SOLUTION:

**"Vehicles never seem to be available."**

Live bookings and automated communications show exactly who has it, when it's due back, and where it is right now.

**"We have vehicles sitting idle."**

Automated processes such as 'no-show' cancellation ensures vehicle availability is optimised, while collecting real data on actual vehicle use.

**"We waste time chasing keys."**

Digital check-in/out with optional smart key box means no more lost keys or manual sign-out sheets.

**"Our logbooks and paperwork is never up-to-date."**

Reports include all trip data and cost centers to ensure vehicles costs and utilisation is accounted for correctly and always up-to-date.

**"We forget to return things on time."**

Automated reminders prompt users ahead of return deadlines – freeing up vehicles for the next job without delays.

## Simple, automated workflow
